Election/Restrictions

All previously withdrawn claims have been rejoined as they depend from an allowed independent claim 1.

Claim Objections

Claim 4 is objected to because of the following informalities: claim 4 depends from canceled claim 2. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10,12,20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 10,12 and 20, there are duplicates of the collar and passages being claimed casting doubt as to whether two of each of these elements are intended to be claimed. Clarification and/or correction are required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 55 is rejected under 35 U.S.C. 102(b) as being anticipated by Blaeser, et al.-5490837.

Blaeser discloses an interventional device having a catheter shaft 12 and a balloon 20 (interventional device) attached to the distal portion of the shaft. Also coupled to the distal portion of the shaft is a guidewire tube 44 whose proximal end is separate from the proximal portion of the shaft. A guidewire 56 slides within the guidewire tube. As disclosed in col. 14 lines 6-56, a guide catheter is outside of the catheter shaft and balloon. If someone so desired, the distal portion of the balloon could be placed just distal to the distal end of the outer guide catheter and then expanded. Expansion would cause the distal portion of the balloon to become deployed yet the proximal portion of the balloon remain undeployed by the constraining outer guide catheter and still coupled to the distal portion of the shaft.

Allowable Subject Matter

Claims 1,3,6-9,11,13-19,22-30 and 50-54 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
